## SUMMARY

Motivated and detail-oriented Computer Science student with hands-on experience in AI, cloud, and full-stack development. Skilled in designing efficient, scalable systems and passionate about building technology that drives measurable real-world results.

## EDUCATION

**Bachelors in Computer Science** 8.97 CGPA (85.22%)
Srinivas University, Mangluru 2022 - 2026

**Pre-University Course (PUC)** 75.33%
Sri Gurukula pu college ,Tiptur 2020 - 2022

**Secondary School Leaving Certificate (SSLC)** 86.23%
VVS high School ,Harpanhalli . 2017 - 2020

## INTERNSHIP

- **Full Stack Development Intern – Analogica Software Development Pvt Ltd**

  Developing full-stack applications using MongoDB, Express.js, React.js and Node.js. Implementing REST APIs and responsive UI designs.
- **Web Development Intern – Cognifyz Technologies**

  Created responsive web pages, integrated APIs, and enhanced site performance for improved interactivity.
- **Mearn Stack Intern – SMAGRA Technologies**

  Built mobile apps with Flutter and Firebase for real-time data synchronization and intuitive UI.

## TECHNICAL SKILLS

- Languages: Python, C,Java
- Web Technologies: HTML5,CSS3,JavaScript, React ,Node JS
- Databases: MySQL, Hadoop
- Tools: Git, GitHub, VS Code, Eclipse
- Concepts: OOPs, Power BI, Data Analytics, Cloud Computing ,Web Development
- Operating Systems: Windows, Linux (Ubuntu)

## PROJECTS

### Cloud-Based Attendance System

- Developed a cloud-hosted attendance management platform using React, Node.js, and Firebase.
- Designed secure authentication and role-based access control, integrated real-time data synchronization, and built an analytics dashboard reducing manual tracking by 60%.

### FaceTrace AI (Forensic Face Construction and Recognition System)

- Engineered an AI-powered forensic system using Python, OpenCV, and TensorFlow to reconstruct and recognize faces from partial images.
- Optimized CNN model accuracy to 92% and reduced processing time for investigative datasets.

**Real-Time Face Emotion Recognition**

- Built a CNN-based model using Python and OpenCV to detect and classify emotions in live video feeds.
- Enhanced real-time performance using frame optimization and GPU acceleration achieving 80% accuracy.

**AI-Based Plant Disease Detection and Suggestion System**

- Created a ML model with TensorFlow and Keras to identify plant diseases from images.
- Developed a Flask-based interface that provides treatment recommendations; findings published in JETIR Journal.

## CERTIFICATIONS

- HTML5 Application Development – Certiport
- Cloud Computing – Certiport
- Data Analytics – Certiport
- DevOps Fundamentals – IBM
- Generative AI Application Design & Development – Udemy

## ACHIEVEMENTS

- Published research paper 'AI-Based Plant Disease Detection and Diagnosis' in JETIR Journal (ISSN: 2349-5162).
- Led multiple team-based software development projects.
- Participated in coding challenges and technical workshops.

| CAREER SKILLS | AREA OF INTEREST | HOBBIES |
|---|---|---|
| Problem Solving | AI/ML | Travelling |
| Adaptability | Full-Stack Development | Trekking |
| Teamwork | Data Science | Cooking |
| Communication | Cloud Computing | Learning New Technology |
| Time Management | | |
